FOREIGN STUDIES COURSES: SPRING 2009

Rome Study Abroad Program

ARCH 306 Studio (6) - The Rome Study Abroad Program is an intensive semester-long program located in the historical center of Rome, Italy. The design studio is taught by CUArch faculty focusing on the local urban condition in conjunction with design challenges and cultural issues. The studio will begin with an intensive study of local architecture and its relationship to the surrounding urban fabric. The design project will begin at an urban scale examining site conditions leading into programmatic decisions. A multi-function building will be explored taking the student from schematic design through detailing.

ARCH 565 Theory (3) - The Rome Study Abroad Program is an intensive semester long program located in the historical center of Rome, Italy. The theory component is taught by CUArch faculty in conjunction with the design studio. Site visits to historical monuments, supplemented by lectures, readings, and required student presentations will occur.

ARCH 574 History (3) - The Rome Study Abroad Program is an intensive semester long program located in the historical center of Rome, Italy. The history component is taught by a local expert through daily site visits to historical monuments, supplemented by lectures, readings, and required student presentations.

ARCH 575 Field Trips (3) – The Rome Study Abroad Program is an intensive semester long program located in the historical center of Rome, Italy. The Field trip course is a combination of weekly site visits to various architectural and urban sites within Rome. In addition, the students travel to different parts of Italy for 2, 7-day field trips to experience the diversity of particular city's development.

ARCH 584 Italian (3) – The Rome Study Abroad Program is an intensive semester long program located in the historical center of Rome, Italy. Students are required to take their second semester of Italian language, while in Rome, to improve on their conversation, reading and writing skills.

Barcelona Study Abroad Program

ARCH 306 Studio (6) - The Barcelona Study Abroad Program is an intensive semester-long program located in the historical center of Barcelona, Spain. The design studio is taught by CUArch faculty focusing on the local urban condition in conjunction with design challenges and cultural issues. The studio will begin with an intensive study of local architecture and its relationship to the surrounding urban fabric. The design project will begin at an urban scale examining site conditions leading into programmatic decisions. A multi-function building will be explored taking the student from schematic design through detailing.

ARCH 565 Theory (3) - The Barcelona Study Abroad Program is an intensive semester long program located in the historical center of Barcelona, Spain. The theory component is taught by CUArch faculty in conjunction with the design studio. Site visits to historical monuments, supplemented by lectures, readings, and required student presentations will occur.

ARCH 574 History (3) - The Barcelona Study Abroad Program is an intensive semester long program located in the historical center of Barcelona, Spain. The history theory component is taught by a local expert through daily site visits to historical monuments, supplemented by lectures, readings, and required student presentations.

ARCH 575 Field Trips (3) – The Barcelona Study Abroad Program is an intensive semester long program located in the historical center of Barcelona, Spain. The Field trip course is a combination of weekly site visits to various architectural and urban sites within Rome. In addition,
the students travel to different parts of Spain for 2, 7-day field trips to experience the diversity of particular city’s development.
